

Special Issue

Coatings for Antimicrobial Textiles

Message from the Guest Editors

The new SARS-CoV-2 pandemic outbreak and other infectious diseases have revealed the necessity for the development of novel materials that could serve as a means of protection against infections by decreasing viral availability, viability and infectivity. The application of these materials for the preparation and functionalization of fabrics would be of great benefit, as these textiles could offer protection to the general population and to healthcare professionals by improving the lifespan and overall performance of textile products.

Textiles are one of the most widely used materials worldwide. They are an integral part of everyday life, and include clothing, home and upholstery textiles, and medical, automotive, packaging and industrial textiles.

This Special Issue aims to highlight new research, new technologies and novel materials that are used to develop antimicrobial coatings for textiles. The scientific area covered includes all the potential applications of antimicrobial textiles, from commercial products that aimed at the general population to specialised fabrics and textiles for medical and healthcare professionals.

Guest Editors

Prof. Dr. Theodora Choli-Papadopoulou

Dr. Rigini M. Papi

Dr. Michalis Karypidis

Dr. Eleftherios G. Andriotis

About the Journal

Message from the Editorial Board

Now more than ever, research is asked to deliver knowledge and technologies to solve the major challenges faced by our society. The development of new materials and devices for (without the ambition to be exhaustive) energy, health and food technology, together with the need for establishing processes that reduce the impact on critical resources and the environment, is indeed in the spotlight of most contemporary research. Surface science and engineering play a key role in this regard, with an incredible potential in delivering new and deep scientific understanding and technical solutions essential to solve most of the major societal challenges.

Coatings is a well-established, peerreviewed, online journal dedicated to the vibrant field of surface science and engineering. Coatings publishes original research articles that report cutting-edge results and review papers that make the point on the hottest research topics.

Editors-in-Chief

Prof. Dr. Wei Pan

State Key Laboratory of New Ceramics and Fine Processing, School of Materials Science & Engineering, Tsinghua University, Beijing 100084, China

Dr. Emerson Coy

NanoBioMedical Centre, Adam Mickiewicz University in Poznań, ul. Wszechnicy Piastowskiej 3, 61-614 Poznań, Poland

Author Benefits

Open Access

– free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, CAPlus / SciFinder, and other databases.
