

Special Issue

Advances in Deposition and Characterization of Hard Coatings

Message from the Guest Editors

We would like to welcome you to submit your article to this Special Issue, which is called “Advances in Deposition and Characterization of Hard Coatings”. The goal of this issue is to gather some of the most recent and interesting contributions to the field of deposition and characterization of hard coatings. Contributions are expected to include the current study of the deposition of hard coatings and the characterization of their properties. In particular, the topics of interest include but are not limited to:

- Numerical simulation on properties of hard coatings and influence of deposition parameters;
- Hard coatings for industrial use;
- Protective and tribological coatings;
- Biomedical coatings;
- Microstructure design and architecture of hard coatings (multilayers, nanocomposite and gradient coatings);
- Structure–property relationships for hard coatings;
- Chemical, plasma, and hybrid deposition processes;
- Thermal spraying hard coatings;
- Advanced methods for characterization of hard coatings;
- Cubic boron nitride and diamond-related hard coatings.

About the Journal

Message from the Editorial Board

Now more than ever, research is asked to deliver knowledge and technologies to solve the major challenges faced by our society. The development of new materials and devices for (without the ambition to be exhaustive) energy, health and food technology, together with the need for establishing processes that reduce the impact on critical resources and the environment, is indeed in the spotlight of most contemporary research. Surface science and engineering play a key role in this regard, with an incredible potential in delivering new and deep scientific understanding and technical solutions essential to solve most of the major societal challenges.

Coatings is a well-established, peerreviewed, online journal dedicated to the vibrant field of surface science and engineering. Coatings publishes original research articles that report cutting-edge results and review papers that make the point on the hottest research topics.

Editors-in-Chief

Prof. Dr. Wei Pan

State Key Laboratory of New Ceramics and Fine Processing, School of Materials Science & Engineering, Tsinghua University, Beijing 100084, China

Dr. Emerson Coy

NanoBioMedical Centre, Adam Mickiewicz University in Poznań, ul. Wszechnicy Piastowskiej 3, 61-614 Poznań, Poland
