

Special Issue

Recent Developments on Functional Coatings for Industrial Applications

Message from the Guest Editors

The Special Issue of the *Coatings* journal is aimed to assess the recent research progress on functional coatings for industrial applications, by worldwide researchers and specialists. The purpose is to address the recent development on functional coatings design, synthesis, and characterization, highlighting its emerging industrial applications in many industrial fields, such as medical, smart textile design, renewable energy, oil and gas, electronic, automotive industries, etc. In such a context, particular emphasis will be given to research developments in order to improve applications and the market extension of functional coatings and films. This Special Issue will consist of original research and review articles. It will offer the readers the newest R&D work on industrially relevant functional coatings. In particular, the topics of interest include, but are not limited to:

- Superhydrophobic surfaces and films;
- Self-healing coatings for corrosion protection;
- Biomedical and biocompatible coatings;
- Conductive polymer films;
- Functional coatings for renewable energy applications;
- Nanostructured and topographic functional coatings.

About the Journal

Message from the Editorial Board

Now more than ever, research is asked to deliver knowledge and technologies to solve the major challenges faced by our society. The development of new materials and devices for (without the ambition to be exhaustive) energy, health and food technology, together with the need for establishing processes that reduce the impact on critical resources and the environment, is indeed in the spotlight of most contemporary research. Surface science and engineering play a key role in this regard, with an incredible potential in delivering new and deep scientific understanding and technical solutions essential to solve most of the major societal challenges.

Coatings is a well-established, peerreviewed, online journal dedicated to the vibrant field of surface science and engineering. Coatings publishes original research articles that report cutting-edge results and review papers that make the point on the hottest research topics.

Editors-in-Chief

Prof. Dr. Wei Pan

State Key Laboratory of New Ceramics and Fine Processing, School of Materials Science & Engineering, Tsinghua University, Beijing 100084, China

Dr. Emerson Coy

NanoBioMedical Centre, Adam Mickiewicz University in Poznań, ul. Wszechnicy Piastowskiej 3, 61-614 Poznań, Poland
