

# Special Issue

## Protective Composite Coatings: Implementation, Structure, Properties

### Message from the Guest Editor

We are pleased to invite you to submit your work to this Special Issue on “Protective Composite Coatings: Implementation, Structure, Properties”. This Special Issue aims to present cutting-edge practical and theoretical research on the structure and properties of composite coatings. Works on the modeling, production, and research of composite coatings obtained by the modern methods of powder metallurgy, CVD, PVD, and other methods are encouraged. Of particular interest are works devoted to composite coatings on additively manufactured parts. For this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

- Composite coatings including metal, ceramic, and/or polymer components;
- Protective coatings on additively manufactured parts;
- The mathematical modeling of coatings, including their implementation, effective properties, and structure modeling;
- Novel ideas, materials, and equipment for the production of composite coatings;
- Reactive and *in situ* formation of composite coatings;
- Multilayer and gradient coatings.

We look forward to receiving your contributions.

## About the Journal

### Message from the Editorial Board

Now more than ever, research is asked to deliver knowledge and technologies to solve the major challenges faced by our society. The development of new materials and devices for (without the ambition to be exhaustive) energy, health and food technology, together with the need for establishing processes that reduce the impact on critical resources and the environment, is indeed in the spotlight of most contemporary research. Surface science and engineering play a key role in this regard, with an incredible potential in delivering new and deep scientific understanding and technical solutions essential to solve most of the major societal challenges.

Coatings is a well-established, peer-reviewed, online journal dedicated to the vibrant field of surface science and engineering. Coatings publishes original research articles that report cutting-edge results and review papers that make the point on the hottest research topics.

### Author Benefits

#### Open Access

– free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Physics, Applied) / CiteScore - Q2 (Surfaces, Coatings and Films)
