

Special Issue

Membrane Coatings for Surface Bio-Modifications

Message from the Guest Editors

We invite researchers to submit innovative and original works to this Special Issue “Membrane Coatings for Surface Bio-modifications”. Membrane coatings involve a variety of platform surface technologies that need inter- and multi-disciplinary approaches to work with. Since there are various biological and clinical applications that need spectacular functions, different bio-modifications via physical, chemical or biological methods on membrane coatings could enable the surfaces to become bioactive, bioinert, biostatic, biocidal and so on, or even multi-functional. Thus, the aim of this Special Issue is to present the latest experiments, technologies, and trials, by highlighting membrane coatings through a combination of original research papers, review articles, and trial papers from leading groups around the world. The topics of interest include but are not limited to:

- Physical membrane for bio-modifications;
- Chemical membrane for bio-modifications;
- Biological membrane for bio-modifications;
- Clinical trial and animal trial;
- Techniques of coating and fabrication;
- Biological interaction with membrane coatings;
- Biofunctional coatings.

Guest Editors

Dr. James Kit-Hon Tsoi

Dental Materials Science, Faculty of Dentistry, The University of Hong Kong, Sai Ying Pun, Hong Kong

Prof. Dr. Chi-Wai Kan

School of Fashion and Textiles, The Hong Kong Polytechnic University, Hung Hom, Kowloon, Hong Kong

Deadline for manuscript submissions

closed (31 January 2022)

About the Journal

Message from the Editorial Board

Now more than ever, research is asked to deliver knowledge and technologies to solve the major challenges faced by our society. The development of new materials and devices for (without the ambition to be exhaustive) energy, health and food technology, together with the need for establishing processes that reduce the impact on critical resources and the environment, is indeed in the spotlight of most contemporary research. Surface science and engineering play a key role in this regard, with an incredible potential in delivering new and deep scientific understanding and technical solutions essential to solve most of the major societal challenges.

Coatings is a well-established, peerreviewed, online journal dedicated to the vibrant field of surface science and engineering. Coatings publishes original research articles that report cutting-edge results and review papers that make the point on the hottest research topics.

Editors-in-Chief

Prof. Dr. Wei Pan

State Key Laboratory of New Ceramics and Fine Processing, School of Materials Science & Engineering, Tsinghua University, Beijing 100084, China

Dr. Emerson Coy

NanoBioMedical Centre, Adam Mickiewicz University in Poznań, ul. Wszechnicy Piastowskiej 3, 61-614 Poznań, Poland
