

Special Issue

Surface Properties of Dental Materials and Instruments

Message from the Guest Editor

Dental materials and instruments are constantly being improved. Additionally, every day, new products are being introduced into the market. This Special Issue will focus on evaluation of antimicrobial, chemical, tribological, and mechanical surface properties of commercially available/experimental dental materials and instruments. Dental materials and instruments are subjected to microbial biofilm. Therefore, evaluation and enhancement of antimicrobial properties of dental products set new trends in the development of material sciences. Dental materials such as adhesive systems, composite resins, ceramics, implants, alloys, and acrylic resins are exposed to oral environments and undergo chemical changes and mechanical factors. Reviews and research on both experimental and commercially available products are welcome.

About the Journal

Message from the Editorial Board

Now more than ever, research is asked to deliver knowledge and technologies to solve the major challenges faced by our society. The development of new materials and devices for (without the ambition to be exhaustive) energy, health and food technology, together with the need for establishing processes that reduce the impact on critical resources and the environment, is indeed in the spotlight of most contemporary research. Surface science and engineering play a key role in this regard, with an incredible potential in delivering new and deep scientific understanding and technical solutions essential to solve most of the major societal challenges.

Coatings is a well-established, peer-reviewed, online journal dedicated to the vibrant field of surface science and engineering. Coatings publishes original research articles that report cutting-edge results and review papers that make the point on the hottest research topics.

Editors-in-Chief

Prof. Dr. Wei Pan

State Key Laboratory of New Ceramics and Fine Processing, School of Materials Science & Engineering, Tsinghua University, Beijing 100084, China

Dr. Emerson Coy

NanoBioMedical Centre, Adam Mickiewicz University in Poznań, ul. Wszechniczy Piastowskiej 3, 61-614 Poznań, Poland

Author Benefits

Open Access

– free for readers, with article processing charges (APC) paid by authors or their institutions.
