

Special Issue

Thin Film Deposition and Characterization Techniques

Message from the Guest Editor

The aim of this Special Issue is to promote different thin film technologies for energy and environmental applications. Indeed, today, technological systems are becoming miniaturized and, therefore, surface treatments find a certain interest in various fields, such as electrochemistry, catalysis, and optics. Each article presented in this issue should include a part elaboration using thin film techniques and a dedicated part for the characterization of the films. In particular, the topics of interest include, but are not limited to:

- Fuel cells materials electrolyte, anode, cathode and/or complete cell,
- Gas sensors,
- Catalysis,
- Transparents conductive oxides

About the Journal

Message from the Editorial Board

Now more than ever, research is asked to deliver knowledge and technologies to solve the major challenges faced by our society. The development of new materials and devices for (without the ambition to be exhaustive) energy, health and food technology, together with the need for establishing processes that reduce the impact on critical resources and the environment, is indeed in the spotlight of most contemporary research. Surface science and engineering play a key role in this regard, with an incredible potential in delivering new and deep scientific understanding and technical solutions essential to solve most of the major societal challenges.

Coatings is a well-established, peerreviewed, online journal dedicated to the vibrant field of surface science and engineering. Coatings publishes original research articles that report cutting-edge results and review papers that make the point on the hottest research topics.

Editors-in-Chief

Prof. Dr. Wei Pan

State Key Laboratory of New Ceramics and Fine Processing, School of Materials Science & Engineering, Tsinghua University, Beijing 100084, China

Dr. Emerson Coy

NanoBioMedical Centre, Adam Mickiewicz University in Poznań, ul. Wszechnicy Piastowskiej 3, 61-614 Poznań, Poland

Author Benefits

Open Access

– free for readers, with article processing charges (APC) paid by authors or their institutions.
