closed (30 June 2020)

Message from the Guest Editors

Dear Colleagues,

We are pleased to invite you to contribute to a forthcoming special topic on "**Surface Forces, Adhesion, and Friction**" to be published in **Colloids and Interfaces**. This Special Issue will focus on the fundamental intermolecular and surface forces at multiple length scales ranging from nano- to macro-scale. Topics of interest will cover intermolecular forces at interfaces, adhesion, anti-adhesion (antifouling), friction, and tribology- and nanotribology-related subjects. Other relevant topics will include nanoscale organization and dynamics of confined molecules and particles at interfaces and in pores when the degree of confinement becomes comparable with the characteristic length scale of the confined molecules and particles.

With best regards,

Prof. Dr. Rosa M. Espinosa-Marzal
Prof. Dr. Younjin Min
Prof. Dr. Seong H. Kim
