

Special Issue

Computational Methods in Aeroacoustics and Hydroacoustics

Message from the Guest Editor

Aeroacoustics and hydroacoustics are increasingly gaining importance in a wide spectrum of engineering applications such as ground and space transportation, ventilation systems, wind turbines, etc. Computational modeling of aeroacoustics and hydroacoustics represents one of the today's most challenging areas in fluid mechanics. The issue is devoted to recent research in the development and innovative application of computational methods in aeroacoustics and hydroacoustics, and welcomes such contributions in all relevant engineering applications. Prof. Dr. -Ing. habil. Ali Cemal Benim

About the Journal

Message from the Editor-in-Chief

You are invited to submit the results of your research for consideration and publication in *Computation*, an international open access journal, which is published monthly online by MDPI.

The editorial board and staff of *Computation* are dedicated to establishing a benchmark journal for the world scientific and engineering communities for original research articles, reviews, conference proceedings (i.e., peer reviewed full articles), and communications, in the cutting-edge areas of computational biology, computational chemistry, computational social science and computational engineering.

Editor-in-Chief

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), CAPus / SciFinder, Inspec, dblp, and other databases.

Journal Rank:

JCR - Q2 (Mathematics, Interdisciplinary Applications) /
CiteScore - Q1 (Applied Mathematics)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.7 days after submission; acceptance to publication is undertaken in 5.6 days (median values for papers published in this journal in the first half of 2025).
