

Special Issue

Recent Advances in Process Modeling and Optimisation

Message from the Guest Editors

Process modeling and process optimization have become more relevant in an increasing spectrum of research disciplines over the last decades. Several research areas are database systems, database management, business process management, information systems, Enterprise Resource Planning (ERP), operations research, formal languages and logics, etc. The necessity of modeling processes as the basis for scientific knowledge building, along with the need to adapt to novel computational practices for process optimization is the inspiring motivation of this Special Issue of *Computation*. The issue is dedicated to new developments in the theoretical and computational techniques of process modelling, optimization and related applications in diverse areas. We invite researchers to contribute their original and high-quality research papers which will further drive the potential of process modeling and optimization.

About the Journal

Message from the Editor-in-Chief

You are invited to submit the results of your research for consideration and publication in *Computation*, an international open access journal, which is published monthly online by MDPI.

The editorial board and staff of *Computation* are dedicated to establishing a benchmark journal for the world scientific and engineering communities for original research articles, reviews, conference proceedings (i.e., peer reviewed full articles), and communications, in the cutting-edge areas of computational biology, computational chemistry, computational social science and computational engineering.

Editor-in-Chief

Prof. Dr. Ali Cemal Benim

Center of Flow Simulation (CFS), Department of Mechanical and Process Engineering, Duesseldorf University of Applied Sciences, D-40476 Duesseldorf, Germany

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), CAPlus / SciFinder, Inspec, dblp, and other databases.

Journal Rank:

JCR - Q2 (Mathematics, Interdisciplinary Applications) /
CiteScore - Q1 (Applied Mathematics)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.7 days after submission; acceptance to publication is undertaken in 5.6 days (median values for papers published in this journal in the first half of 2025).
