Message from the Guest Editors

Various computer technologies are transforming the practice of medicine and healthcare. It has been well-recognized that personalized medicine and healthcare would be much more effective than the traditional one-size-for-all model. The availability of smartphones, smartwatches, and health trackers makes it possible for collect valuable data from individuals. The collected data can then be analyzed and used to train personalized models, which could lead to early diagnosis of diseases and personized treatments. Technologies have also been used to help diagnose some diseases much faster, and potentially with higher accuracy. On the other hand, the availability of consumer-grade depth cameras makes it possible to develop systems that be deployed at residential homes to help guide patients to perform rehabilitation exercises for a speedy recovery. Furthermore, virtual reality has been used in the medical setting to reduce patient pain levels.

Special Issue

Editor-in-Chief

Department of Computer Science
& Engineering (DISI), University of
Bologna, 40136 Bologna, Italy

Message from the Editor-in-Chief

You are invited to contribute a research article, a comprehensive review or a software paper for consideration and publication in Computers (ISSN 2073-431X). Computers is an international, peer-reviewed, open access journal which provides an advanced forum for computer sciences. Computers is published in open access format—research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, ESCI (Web of Science), dblp, Inspec, Ei Compendex, and other databases.
Journal Rank: JCR - Q2 (Computer Science, Interdisciplinary Applications) / CiteScore - Q1 (Computer Science (miscellaneous))
