Dear Colleagues,

Human-centered cyber systems are intrinsically multidisciplinary, which requires the collaboration of researchers and developers in systems science and engineering, human-machine systems, and cybernetics. We welcome original research contributions and manuscripts that have been substantially extended based on conference proceeding publications such as IEEE SMC. Topics of interests include any subjects in the areas of systems science and engineering, human-machine systems, and cybernetics, such as affective computing, cyber-physical systems, distributed intelligent systems, artificial life, human-computer interaction, augmented cognition, assistive technology, user interface design, usability study, robotic systems, machine vision, medical informatics, decision support systems, etc.

You are invited to contribute a research article, a comprehensive review or a software paper for consideration and publication in *Computers* (ISSN 2073-431X). *Computers* is an international, peer-reviewed, open access journal which provides an advanced forum for computer sciences. *Computers* is published in open access format—research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High visibility: Indexed in the Emerging Sources Citation Index (ESCI - Web of Science), *Inspec* (IET) and DBLP. To be added in Scopus from Vol. 7 (2018).

Rapid publication: manuscripts are peer-reviewed and a first decision provided to authors approximately 16.5 days after submission; acceptance to publication is undertaken in 3.8 days (median values for papers published in this journal in the second half of 2018).
