## Special Issue

## Recent Advances in Social Networks and Social Media

### Message from the Guest Editor

Studies of social networks have been conducted for a century in a variety of disciplines such as sociology, psychology, economics, and anthropology. The recent advances in Internet, the social web, and other largescale social and technological infrastructure have triggered a growing interest and significant methodological advancements in social network analysis and mining. Inspired by these research problems, new methods from graph theory, machine learning and data mining, statistics, and statistical mechanics have been developed, which in turn opens up further possibilities for more interesting applications. These have led to a rising prominence of analysis of social networks and social media using different methods and tools from academia, business, and politics.

This Special Issue aims to bring together the latest research on recent developments in social networks and social media. We welcome novel research articles, comprehensive reviews, and survey articles.

## **About the Journal**

### Message from the Editor-in-Chief

You are invited to contribute a research article, a comprehensive review or a software paper for consideration and publication in Computers (ISSN 2073-431X). Computers is an international, peer-reviewed, open access journal which provides an advanced forum for computer sciences. Computers is published in open access format—research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

### Editor-in-Chief

Prof. Dr. Paolo Bellavista

Department of Computer Science & Engineering (DISI), University of Bologna, 40136 Bologna, Italy

#### **Author Benefits**

### **High Visibility:**

indexed within Scopus, ESCI (Web of Science), dblp, Inspec, Ei Compendex, and other databases.

### **Journal Rank:**

JCR - Q2 (Computer Science, Interdisciplinary Applications) / CiteScore - Q1 (Computer Science (miscellaneous))

### **Rapid Publication:**

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.3 days after submission; acceptance to publication is undertaken in 3.8 days (median values for papers published in this journal in the first half of 2025).
