Advanced Localization Solutions in IoT Smart Industry: Innovation, Challenges, and Applications

Message from the Guest Editors

The proliferation of Internet of Things (IoT) technologies has led to a paradigm shift in the way interconnected devices communicate, share data, and perform tasks autonomously. One of the key areas that has benefited significantly from the IoT revolution is localization and tracking. By leveraging the power of IoT, businesses and industries now have the capability to pinpoint the exact location of objects in real-time, enabling a wide range of applications such as asset tracking, indoor navigation, and smart logistics. In logistics, the proficiency in pinpointing items and manoeuvring through intricate settings is of prime importance. IoT solutions and sophisticated sensor integration are instrumental in refining the pinpointing of goods within storage facilities. This leads to more streamlined robot motion planning and inventory oversight, guaranteeing precise movement and tracking of products throughout the supply chain.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article, a comprehensive review or a software paper for consideration and publication in Computers (ISSN 2073-431X). Computers is an international, peer-reviewed, open access journal which provides an advanced forum for computer sciences. Computers is published in open access format—research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Paolo Bellavista

Department of Computer Science & Engineering (DISI), University of Bologna, 40136 Bologna, Italy

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), dblp, Inspec, Ei Compendex, and other databases.

Journal Rank:

JCR - Q2 (Computer Science, Interdisciplinary Applications) / CiteScore - Q1 (Computer Science (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.3 days after submission; acceptance to publication is undertaken in 3.8 days (median values for papers published in this journal in the first half of 2025).
