submissions:

**closed (30 September 2017)**

### Message from the Guest Editor

Dear Colleagues,

Layered superconductors have attracted much attention, due to the emergence of high-T<sub>c</sub> and unconventional superconductivity. Thus, the discovery of new layered superconductors and understanding of superconductivity mechanisms are very important for exploring new high-T<sub>c</sub> superconductors. In this special issue, we focus on the exploration of novel layered superconductors, such as Fe-based, Bi-based, and Ti-based layered superconductors. In addition, superconducting properties of high quality bulk and thin film samples will be explored in this special issue.

Keywords:

- layered superconductor
- Fe-based superconductor
- Bi-based superconductor
- Ti-based superconductor
- thin film
- superconducting properties

Dr. Yoshikazu Mizuguchi

## Message from the Editor-in-Chief

Welcome to *Condensed Matter* (ISSN 2410-3896)! It gives me great pleasure to invite you to publish in the journal. We are looking to build a collection of high quality research articles, supported by a community from across the field of condensed matter physics. In this task, I will be assisted by a highly qualified editorial board. We accept papers on basic research as well as applications, and experimental or theoretical work. Currently the journal is indexed by ESCI (Web of Science) and hope you can consider *Condensed Matter* as an exceptional home for your manuscript.

## Author Benefits

**Open Access:**— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [ESCI \(Web of Science\)](#), [Inspec \(IET\)](#), [Chemical Abstracts](#), and many [other databases](#).

**Rapid Publication:** manuscripts are peer-reviewed and a first decision provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 3.7 days (median values for papers published in this journal in the second half of 2020).
