Message from the Guest Editor

In recent years, an increasing trend in the use of natural ingredients in the cosmetic and personal care industry in order to obtain more green and biocompatible cosmetic formulations has been observed. In this sense, biosurfactants, also known as microbial surfactants, are surface-active compounds used in cosmetics (such as in soap, shampoo, toothpaste, deodorant, skin care, perfume, make-up, among other products) due to their detergency, emulsification, dispersion, solubilization of hydrophobic substrates, wetting, foaming, and ability to modify surfaces, among other possible activities or roles.

This Special Issue focuses on: (i) the applicability of biosurfactants in cosmetics and personal care formulations, (ii) the benefits of biosurfactant usage for cosmetic applications in comparison with the chemically synthesized ones (surfactants), (iii) the impact on health of these active-surface compounds by means of toxicity or cytotoxicity tests, and (iv) the cosmetic regulatory perspectives for these natural detergents.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Enzo Berardesca

Department of Dermatology and
Cutaneous Surgery, University of
Miami, Miami, FL 33136, USA

Message from the Editor-in-Chief

Cosmetics is an international, scientific, open access journal on the science and technology of cosmetics, published by MDPI online quarterly. Original articles, reviews and other acceptance. The scientific community and the general public can unlimitedly access the content free of charge as soon as it is published. As a new journal, the publication fees are fully waived for papers submitted to *Cosmetics* in 2017. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, ESCI (Web of Science), CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Dermatology*) / CiteScore - Q1 (Surgery)
