

Special Issue

Applications of Optical and Electronic Sensing Technologies for Skin Bioengineering

Message from the Guest Editor

This Special Issue provides a bird's-eye view of the latest developments in the applications of optical and electronic sensing technologies for skin bioengineering. It includes both optical sensing technology, such as UV/visible/infrared sensors, and electronic sensing technology, such as electronic skin sensors. It also covers both laboratory-based bench-top equipment, as well as commercial devices, such as wearable technologies. The aim of this collection is to publish scientific papers on the cutting-edge technical background, measurement principles and applications of Skin Bioengineering.

About the Journal

Message from the Editor-in-Chief

Cosmetics is an international, scientific, open access journal on the science and technology of cosmetics, published by MDPI online quarterly. Original articles, reviews and other acceptance. The scientific community and the general public can unlimitedly access the content free of charge as soon as it is published. As a new journal, the publication fees are fully waived for papers submitted to *Cosmetics* in 2017. We would be pleased to welcome you as one of our authors.
