Biofilms in Cosmetic Dermatology

Message from the Guest Editors

Biofilms are microbial communities living within a matrix of extracellular polymeric substances that promote adhesion to living or non-living surfaces. It is acknowledged that ~80% of human infections are linked to biofilms. Nevertheless, many antimicrobial studies still focus only on free cells. Biofilms are responsible for a numerous array of skin disorders. Clinically, biofilms pose a huge challenge due to their persistence and higher tolerance or resistance to traditional antimicrobial treatments. Despite current limitations in treatment options, a deeper comprehension of biofilm molecular biology and its pathogenicity holds promise for the creation of innovative anti-biofilm agents tailored for clinical application in dermatology.

Guest Editors

Dr. Célia Fortuna Rodrigues

About the Journal

Message from the Editor-in-Chief

Cosmetics is an international, scientific, open access journal on the science and technology of cosmetics, published by MDPI online quarterly. Original articles, reviews and other acceptance. The scientific community and the general public can unlimitedly access the content free of charge as soon as it is published. As a new journal, the publication fees are fully waived for papers submitted to *Cosmetics* in 2017. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Enzo Berardesca
Department of Dermatology and Cutaneous Surgery, University of
Miami, Miami, FL 33136, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Dermatology) / CiteScore - Q1 (Surgery)
