

Special Issue

Plant-Based Cosmeceuticals: Recent Developments and Advances

Message from the Guest Editors

This Special Issue calls for manuscripts related to cosmetic applications of plants and their constituents for managing skin-related conditions and general well-being. This is envisaged to focus on the whole-value chain entailed the use of plants as cosmetics and further elucidate their value as natural-based products which are safe and efficient in today's world. We welcome submissions focusing on the documentation of the indigenous knowledge associated with the use of plants for skin-related conditions, biological efficacies, phytochemical profiling, safety assessment, value-addition, and enhancement (e.g., nanoparticles), as well as quality control issues and conservation strategies for these valuable natural resources.
