Antipollution Cosmetics: Trends, Test and Issues

Message from the Guest Editor

Antipollution cosmetics are gaining momentum in the cosmetic world. China is leading the way in this field. Cosmetic ingredient manufacturers have been developing new anti-oxidants, film-formers, skin rejuvenating excipients, innovative technologies, etc. at rapid speeds. However, the key issues remain un-addressed, such as universal antipollution test methods to assess efficacy and safety of products, global regulatory requirements and development cost, which consumers need to pay. Additionally, this important challenge also creates opportunities for businesses, as well as research institutes. Academia-industry collaborations are needed for this emerging field.

About the Journal

Message from the Editor-in-Chief

Cosmetics is an international, scientific, open access journal on the science and technology of cosmetics, published by MDPI online quarterly. Original articles, reviews and other acceptance. The scientific community and the general public can unlimitedly access the content free of charge as soon as it is published. As a new journal, the publication fees are fully waived for papers submitted to *Cosmetics* in 2017. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Enzo Berardesca
Department of Dermatology and Cutaneous Surgery, University of
Miami, Miami, FL 33136, USA
