

Special Issue

Cosmetics Contact Allergens

Message from the Guest Editor

In the last decade, the number of non-animal approaches for skin sensitization risk assessment has risen dramatically. With further methods at various validation stages and new approaches constantly emerging, it is an exciting moment for dermatotoxicological research. However, the safety testing of cosmetics still faces challenges, including potency assessment and the testing of complex mixtures, which includes essentially the entire cosmetic realm.

This Cosmetic Contact Allergens Special Issue aims to provide a collection of trending topics in the field of skin sensitization. Critical reviews and articles covering the state-of-the-art and future of alternative methods, industrial and regulatory perspectives will be the main focus of this special edition. Articles covering the applicability of computational, in chemico and in vitro methods, especially to complex formulations and botanicals, will be particularly welcomed.

About the Journal

Message from the Editor-in-Chief

Cosmetics is an international, scientific, open access journal on the science and technology of cosmetics, published by MDPI online quarterly. Original articles, reviews and other acceptance. The scientific community and the general public can unlimitedly access the content free of charge as soon as it is published. As a new journal, the publication fees are fully waived for papers submitted to *Cosmetics* in 2017. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Enzo Berardesca
Department of Dermatology and Cutaneous Surgery, University of
Miami, Miami, FL 33136, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Dermatology) / CiteScore - Q1 (Surgery)
