Cosmetovigilance: Public Health Perspective

Message from the Guest Editors

Cosmetovigilance is the assemblage of actions correlated with the appraisal, compilation, and scrutinizing of unwanted adverse events reported/observed during or after the normal use of cosmetics. It is simply a term which was introduced in the context of a pharmacovigilance system for cosmetic products and coined in relation to post-marketing surveillance by the industry. The identification of undesirable events from cosmetics is an arduous task, and limited reporting and estimation coupled with the lack of guidelines and standardized reporting forms places the user and healthcare professional in a catch-22 situation. A dearth of information also exists pertaining to safety monitoring-vigilance activities for cosmetics and cosmeceuticals. This Special Issue calls for the manuscripts that explore areas related to the reporting of adverse effects, the assessment of reporting and validation, benefit-risk assessments, safety alert/recalls, and changes to product information pertaining to cosmetics and cosmeceuticals. We also welcome research pertaining to questionnaire validation in areas of safety, monitoring, and risk-benefit assessment of cosmeceuticals.

About the Journal

Message from the Editor-in-Chief

Cosmetics is an international, scientific, open access journal on the science and technology of cosmetics, published by MDPI online quarterly. Original articles, reviews and other acceptance. The scientific community and the general public can unlimitedly access the content free of charge as soon as it is published. As a new journal, the publication fees are fully waived for papers submitted to *Cosmetics* in 2017. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Enzo Berardesca
Department of Dermatology and Cutaneous Surgery, University of
Miami, Miami, FL 33136, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Dermatology) / CiteScore - Q1 (Surgery)
