

Special Issue

Topical Pharmaceutical Products and Cosmetics

Message from the Guest Editor

This special issue aims at focusing attention on the most modern formulation methods to direct the active ingredient at the site of action in or beyond the skin barrier for the treatment of localized or diffuse diseases. In the first case, we talk about topical administration with an effect on the surface of the skin or within the skin (epidermis and dermis) to treat cutaneous disorders or cutaneous manifestations of a general disease, also with cosmetic purposes; the second case refers to transdermal administration with systemic effect. The skin can be considered a real organ covering the body, with different functions: protective and barrier, sensorial, secretive and temperature and blood pressure regulation. The extremely effective barrier effect against external substances, microorganisms, sunlight, heat and electric current makes the skin difficult to penetrate and permeate. In fact, there are few molecules that easily permeate the cutaneous barrier due to their chemical and physical characteristics. The formulation plays an essential role in the interaction between the active and the substrate and in reversibly modifying the permeability of the skin barrier.

About the Journal

Message from the Editor-in-Chief

Cosmetics is an international, scientific, open access journal on the science and technology of cosmetics, published by MDPI online quarterly. Original articles, reviews and other acceptance. The scientific community and the general public can unlimitedly access the content free of charge as soon as it is published. As a new journal, the publication fees are fully waived for papers submitted to *Cosmetics* in 2017. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Enzo Berardesca
Department of Dermatology and Cutaneous Surgery, University of
Miami, Miami, FL 33136, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Dermatology) / CiteScore - Q1 (Surgery)
