Special Issue

Skin Aging

Message from the Guest Editor

Signs of aging become evident as life progresses, and skin changes constitute the first obvious evidence of the aging process. Skin ages in both men and women through parallel internal and external processes, which contribute simultaneously to a progressive loss of skin integrity. During the aging process, the three-layer skin system changes markedly. There is an increased interest by the cosmetic industry in developing new molecules with the capacity of supporting dermal extracellular matrix organization, essentially improving it and avoiding skin aging. This Special Issue, "Skin Aging", is aimed at presenting the newest scientific investigations based on both an understanding of the complex processes of skin aging and the study of new molecules, which can be essential for their incorporation in cosmetic products, which fight against skin aging. This overview of the current knowledge in this field will be provided through original papers, reviews and short communications.

About the Journal

Message from the Editor-in-Chief

Cosmetics is an international, scientific, open access journal on the science and technology of cosmetics, published by MDPI online quarterly. Original articles, reviews and other acceptance. The scientific community and the general public can unlimitedly access the content free of charge as soon as it is published. As a new journal, the publication fees are fully waived for papers submitted to Cosmetics in 2017. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Enzo Berardesca

Department of Dermatology and Cutaneous Surgery, University of Miami, Miami, FL 33136, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Dermatology) / CiteScore - Q1 (Surgery)
