

## Special Issue

# COVID-19 and Nephrology

### Message from the Guest Editor

Nephrologists face new and important challenges posed by the COVID-19 pandemic. Although the kidney is not the primary target of SARS-CoV-2, the virus has a severe impact on patients with kidney diseases, who may be more vulnerable and susceptible to severe infection. In addition, kidney transplant patients face a higher risk of complications following SARS-CoV-2 infection, and many studies show that COVID-19 can induce kidney damage through direct or indirect mechanisms. This Special Issue will focus on all aspects of the COVID-19 pandemic in the field of nephrology, including management and appropriate therapy, epidemiology and clinical outcomes.

### Guest Editor

Dr. Daniela Ponce

Botucatu School of Medicine (FMB), Clinical Medicine Department,  
University of São Paulo State—UNESP, Botucatu, Brazil

### Deadline for manuscript submissions

closed (31 May 2024)
