

Special Issue

COVID and Public Health

Message from the Guest Editor

We are pleased to invite researchers and experts to contribute original articles to a Special Issue focusing on COVID-19 and public health. This Special Issue will explore the ongoing impact of the pandemic on global health systems and public health policies. We welcome contributions that address a wide range of topics, including epidemiology, vaccine strategies, risk–benefit quantification methods, healthcare plans that address long-COVID, and the assessment of public health policies during and after the pandemic across different countries. We also welcome submissions that present methodologies for the monitoring of the evolution of the virus; these could address the integration of case numbers, hospitalizations, and deaths into public databases, variant tracking, and wastewater surveillance. By publishing innovative research, this Special Issue aims to inform and influence preparations for future pandemics and public health crises.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *COVID*. *COVID* is published in open access format—research articles, reviews and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. With the efforts of our professional team and the great potential of *COVID* topics, the impact factor of this journal will dramatically increase in the coming years. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giuseppe Novelli

Department of Biomedicine & Prevention, Genetics Section, University of Rome Tor Vergata, 00133 Rome, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within ESCI (Web of Science), Scopus, CAPus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q2 (Immunology and Microbiology (miscellaneous))
