Message from the Guest Editors

One of the main challenges of food production are pests and diseases. Biological control arises as a promising strategy to assist producers in pest and diseases control by increasing food quality and quantity, reducing the negative impact of chemical products, and improving the producer's incomes. However, the knowledge about biological control in many food systems is insufficient to achieve those ambitions. In this special issue contributions to biological control in food crops are welcome. Research articles, reviews and opinion letters may include, but not limit to: (i) pest/diseases population reductions through biological control; (ii) improvement of food quality, quantity and producers' incomes through biological control; (iii) comparisons between chemical applications and biological control (e.g., environmental or health impacts, crop incomes); (iii) natural control agents efficiency; (iv) natural control agents ecology (living requirements, resources preferences); (v) interactions between management and landscape factors on biological control; (vi) interactions (e.g., trophic interactions) among organisms within the system.

Deadline for manuscript submissions:

closed (25 July 2024)

Message from the Editor-in-Chief

Crops (ISSN 2673-7655) is an international, peer-reviewed, open access journal. It publishes original articles, critical reviews, and short communications in every aspect of crop science. The journal invites contributions concerning production, improvement and utilization of all plants that are grown as crops including grains, oilseeds, forages, vegetables, fruits, nuts, and those grown for industrial uses. Our aim is to publish timely experimental and theoretical research results in a rapid and readily accessible manner. Every published article is made immediately available worldwide with free and unlimited access to everyone. If you want your work to reach a global audience of crop scientists, we invite you to submit a paper *Crops*, the international journal of crop science.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **ESCI (Web of Science)**, **Scopus**, and **other databases**.

Journal Rank: JCR - Q2 (Agronomy) / CiteScore - Q2 (Agronomy and Crop Science)
