

Special Issue

Cryogenic Flows

Message from the Guest Editors

To increase confidence in the design of cryogenic systems and decrease their costs, more comprehensive information on cryogenic flows is required. This Special Issue invites papers on both experimental and modeling studies furthering understanding of cryogenic flow phenomena. The topics include (but are not limited to) properties of cryogenic fluids, ortho-parahydrogen conversion, different flow regimes, multiphase phenomena, flow instabilities, cryogenic heat transfer, fluid system components (pumps, valves, etc.), and novel measuring techniques for cryogenic flows.

Guest Editors

Prof. Dr. Konstantin Matveev

Hydrogen Properties for Energy Research (HYPER) Center, School of Mechanical and Material Engineering, Washington State University, Pullman, WA 99164, USA

Dr. Arman Siahvashi

School of Aerospace, Mechanical, and Mechatronic Engineering, J07 Mechanical Engineering Building, The University of Sydney, Camperdown, NSW 2050, Australia

Deadline for manuscript submissions

31 December 2026

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Yanzhong Li
Institute of Refrigeration and Cryogenic Engineering, Xi'an Jiaotong
University, Xi'an 710049, China

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

Rapid Publication:

first decisions in 18 days; acceptance to publication in 7 days (median values for MDPI journals in the first half of 2026).

Recognition of Reviewers:

Reviewers whose reports are timely and of high quality receive an APC discount voucher for a future publication in an MDPI journal. Become a reviewer.
