

Topical Collection

Survey of Cryptographic Topics

Message from the Collection Editor

The aim of this collection is to collect high-quality survey papers on topics related to cryptography. Overviews of the current state of cryptographic research activities are invited. They may target a specific field or area of cryptography. They may focus on: (1) identification of research gaps and future research directions; (2) ethical/social aspects of cryptography and their impact on human rights and social coherence; and (3) cryptographic practice, implementation, and standardisation. Needless to say, all submissions are subject to a normal review process.

About the Journal

Message from the Editor-in-Chief

Cryptography is a new international journal which provides the state-of-the-art forum for original results in all areas of modern cryptography. *Cryptography* is published in open access format: research articles, reviews and other contents are released on the internet immediately after acceptance. Our journal welcomes submissions written from the theory and practices of modern cryptography, so that it may become a forum for exchange of new scientific developments between the cryptographers and the practitioners.

We would be pleased to welcome you as one of our authors.
