

Special Issue

Emerging Topics in Blockchain Security and Privacy

Message from the Guest Editor

Blockchain technologies have been used in various fields and, thus, security and privacy are of great importance. This Special Issue aims to provide a platform for researchers to publish high-quality and original research papers presenting the recent development and state-of-the-art solutions for addressing various security and privacy issues in blockchain. The Special Issue welcomes contributions from theory to practice and from many research fields, such as cryptography, network, distributed systems, and economics.
