

Special Issue

Secure Multiparty Computation

Message from the Guest Editors

Secure multiparty computation (SMC) enables collaborative privacy-preserving computation without relying on trusted individuals or institutions. The focus of this Special Issue will cover all aspects of research addressing the challenges and limitations currently slowing down the maturation of SMC technology toward wider adoption. This includes (but is not limited to) research results on SMC protocols, languages and frameworks, performance and scalability, security models, security proofs, formal verification, standardization, benchmarks or successful case studies.

About the Journal

Message from the Editor-in-Chief

Cryptography is a new international journal which provides the state-of-the-art forum for original results in all areas of modern cryptography. *Cryptography* is published in open access format: research articles, reviews and other contents are released on the internet immediately after acceptance. Our journal welcomes submissions written from the theory and practices of modern cryptography, so that it may become a forum for exchange of new scientific developments between the cryptographers and the practitioners.

We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Josef Pieprzyk

1. Data61, CSIRO (the Commonwealth Scientific and Industrial Research Organisation), Sydney, NSW 2000, Australia
2. Institute of Computer Science, Polish Academy of Science, 02-668 Warszawa, Poland

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), dblp, and other databases.

Journal Rank:

JCR - Q2 (Computer Science, Theory and Methods) /
CiteScore - Q1 (Applied Mathematics)
