### Message from the Guest Editor

The Special Issue on “Crystal Structures of Various Amino Acids and Peptides” is intended to collect contributions from scientist working with a broad spectrum of crystal properties as well as on crystal growth, manifesting the impact of these small, yet incredibly important molecules. I hope we can inspire each other and open avenues to future research projects into the unknown.

The topics summarized under the keywords cover broadly examples of the greater number of sub-topics in mind and should be seen as examples rather than limitations. Innovative research within chemistry, physics or pharmacy is particularly welcome.
