Erzurum 25240, Turkey

Deadline for manuscript  
submissions:

**closed (28 February 2023)**

### Message from the Guest Editors

Dear Colleagues,

In the last decade, metallic alloys have become more widely researched due to their special properties. Despite all their mechanical features, one limitation, related to high chemical reactivity and less compact oxidation films, increases the risk of corrosion. Various surface modification techniques must be adopted to impair this restriction, focusing on the electrochemical interaction between the intermetallic layers and the external environment. The purpose of this Special Issue, “Corrosion-Resistant Coatings of Metallic Materials”, is to publish advanced theoretical research concerning various additional alloy coatings, along with experimental proof enabling researchers to practically resolve factors caused by corrosive environments. Such complexity has caused it to be even more necessary to address the effects of corrosion on coatings. Moreover, we hope for the electrochemical response to be discussed explicitly based on a detailed corrosion mechanism. All manuscripts are thoroughly reviewed, and those accepted will be published immediately online in an ongoing fashion in this Special Issue.

## Message from the Editor-in-Chief

Welcome to *Crystals*, the journal dedicated to the fascinating world of crystallographic research! Crystals are more than mere decorative elements; they hold the key to understanding the fundamental structure of matter. Our mission is to explore the crucial significance of this research across various fields. From medicine to technology, chemistry to geology, crystals play a vital role. Their structure provides insights into new advanced materials, innovative drugs, and groundbreaking technologies. Through *Crystals*, we delve into the microscopic world to discover solutions that will shape the future. Join us on a journey through the *Crystals*, where science merges with beauty and innovation.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [Inspec](#), [CAPus](#) / [SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Crystallography*) / CiteScore - Q2 (*Condensed Matter Physics*)
