and Engineering, Faculty of
Mechanical Engineering,
Budapest University of
Technology and Economics, H-
1111 Budapest, Hungary

vmkornel@eik.bme.hu

Deadline for manuscript
submissions:

30 April 2021

Message from the Guest Editor

Papers are also invited in the field of additive manufacturing, especially wire and arc additive manufacturing, as numerous phase transformations can occur in DSS whose circumstances have not yet been extensively researched.

Manuscripts dealing with the determination of the processability (e.g., via machining, forming, welding, etc.) of newly developed DSS grades are also encouraged.

Submitted papers should establish a correlation between microstructure and mechanical and/or corrosion properties with an emphasis on possible industrial uses.

Physical Chemistry, Universität
Konstanz, Germany

Message from the Editor-in-Chief

Crystals are a very important class of structured material, both from a scientific and technological viewpoint. In 2011, the Nobel Prize in Chemistry was awarded to Dan Schechtman for his work on quasicrystals. Our journal already expresses in its name *Crystals* that its focus centers around all aspects of this class of materials, which has fascinated humankind from its beginning. Despite decades of research on crystals, it remains a hot and fascinating research topic.

Crystals is a good platform for dissemination of knowledge in this area.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: Indexed by the [Science Citation Index Expanded](#) (Web of Science), [Scopus](#), [SciFinder \(CAS\)](#), [Inspec \(IET\)](#), [Current Contents - Physical, Chemical & Earth Sciences](#) and [other databases](#).

CiteScore 2019 (Scopus): 2.9, ranks 103/281 in 'General Chemical Engineering', 208/460 in 'General Materials Science', and 191/403 in 'Condensed Matter Physics'.
