Deadline for manuscript  
submissions:

**closed (31 January 2021)**

### Message from the Guest Editor

Dear Colleagues,

Crystallization processes have long been a particular concern of research and industrial applications, e.g., in the production of drugs. Even though there have been many model approaches and helpful theoretical concepts for understanding crystallization processes in this field, many questions still remain unanswered today, for example: How can crystal forms be controlled by additives, by the composition of the solvents, or by physical action? Which molecular processes influence biomineralization? This Special Issue will focus on models that address the role and structure of individual molecules that capture small length and time scales but have a decisive influence on the macroscales of crystallization. We invite researchers to contribute to this Special Issue on Molecular Modeling which is intended to serve as a unique multidisciplinary forum covering broad aspects of science, technology, and application. We especially welcome contributions in which scientists from different disciplines develop general or specific models for the understanding and/or possible control of complex crystallization processes.

## Message from the Editor-in-Chief

Welcome to *Crystals*, the journal dedicated to the fascinating world of crystallographic research! Crystals are more than mere decorative elements; they hold the key to understanding the fundamental structure of matter. Our mission is to explore the crucial significance of this research across various fields. From medicine to technology, chemistry to geology, crystals play a vital role. Their structure provides insights into new advanced materials, innovative drugs, and groundbreaking technologies. Through *Crystals*, we delve into the microscopic world to discover solutions that will shape the future. Join us on a journey through the *Crystals*, where science merges with beauty and innovation.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [Inspec](#), [CAPus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Crystallography*) / CiteScore - Q2 (*Condensed Matter Physics*)
