Raman Spectroscopy of the Organic Solid State

Guest Editors:

Prof. Dr. Elisabetta Venuti

Department of Industrial
Chemistry "Toso Montanari",
University of Bologna, Bologna,
Italy

Dr. Tommaso Salzillo

Institut de Ciència de Materials
de Barcelona (ICMAB-CSIC),
Campus UAB, 08193 Bellaterra,
Spain

Deadline for manuscript
submissions:

closed (20 November 2020)

Message from the Guest Editors

We would like this Special Issue on the “Raman Spectroscopy of the Organic Solid State” to be open to both research papers and review articles dealing with investigations of the organic solid state through theoretical and experimental Raman spectroscopy. The focus should be on material characterization and molecular and structural identification, along the lines suggested by the keywords, where a few, but not all the possible topics, are given.

- Organic molecular crystals
- Pharmaceutical compounds
- Organic electronics
- Polymorphism
- Lattice phonons
- Lattice dynamics
- Solid state computational methods
- Crystalline thin film
- In situ characterization
- Metal organic frameworks
- Phase transition
- Solid state photoreactivity

Department of Physics, University
of Pisa, 56126 Pisa, PI, Italy

Message from the Editor-in-Chief

Welcome to *Crystals*, the journal dedicated to the fascinating world of crystallographic research! Crystals are more than mere decorative elements; they hold the key to understanding the fundamental structure of matter. Our mission is to explore the crucial significance of this research across various fields. From medicine to technology, chemistry to geology, crystals play a vital role. Their structure provides insights into new advanced materials, innovative drugs, and groundbreaking technologies. Through *Crystals*, we delve into the microscopic world to discover solutions that will shape the future. Join us on a journey through the *Crystals*, where science merges with beauty and innovation.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [Inspec](#), [CAPus](#) / [SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Crystallography*) / CiteScore - Q2 (*Condensed Matter Physics*)
