Via G. Amendola, 122/O, 70126  
Bari, Italy

**Dr. Francesco Scattarella**

Institute of Crystallography- CNR,  
Via G. Amendola, 122/O 70126  
Bari, Italy

Deadline for manuscript  
submissions:

**closed (31 December 2020)**

### Message from the Guest Editors

Small- and wide- angle X-ray scattering (SAXS/WAXS) are powerful experimental techniques widely used in several fields of materials science. Both these techniques enable the characterization of nanoscale and molecular structures in a variety of materials, such as biomacromolecules, liquid nanoparticle dispersions/colloids, nanocomposites, polymers, fiber-like materials, surfactants, microemulsions, liquid crystals, mesoporous materials, etc.

We invite researchers to contribute to this Special Issue, which is intended to serve as a unique multidisciplinary forum covering broad aspects on both techniques applied to nano and bio-materials. Contributions on methods and software devoted to SAXS and WAXS data analysis are welcomed as well.

The potential topics include but are not limited to:

- SAXS applied to macromolecules to deal the protein complexes;
- Application on several fiber-like materials for different applications, ranging from medicine to technology;
- Methods and computer software packages for SAXS/WAXS data analysis (new or improvements of the previous ones).

of Pisa, 56126 Pisa, PI, Italy

## Message from the Editor-in-Chief

Welcome to *Crystal*, the journal dedicated to the fascinating world of crystallographic research! Crystals are more than mere decorative elements; they hold the key to understanding the fundamental structure of matter. Our mission is to explore the crucial significance of this research across various fields. From medicine to technology, chemistry to geology, crystals play a vital role. Their structure provides insights into new advanced materials, innovative drugs, and groundbreaking technologies. Through *Crystal*, we delve into the microscopic world to discover solutions that will shape the future. Join us on a journey through the crystal, where science merges with beauty and innovation.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [Inspec](#), [CAPus](#) / [SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Crystallography*) / CiteScore - Q2 (*Condensed Matter Physics*)
