

Semiconductor Nanomaterials Surfaces

Guest Editor:

Prof. Dr. Jacek Szuber

Faculty of Automatic Control,
Electronics and Computer
Science, Department of
Cybernetics, Nanotechnology
and Data Processing, Silesian
University of Technology, 44-100
Gliwice, Poland

Deadline for manuscript
submissions:

closed (30 September 2018)

Message from the Guest Editor

Dear Colleagues,

This Special Issue will be dedicated to a comprehensive overview of current knowledge related to the surface of low-dimensional semiconductor nanomaterials, on aspects of their potential applications.

Contributions are invited on a wide range of topics in this general research area, including both reviews and research articles, with a special emphasis on (but not limited to):

- Controlled synthesis of high-quality semiconductor nanomaterials of well controlled surfaces,
- Advanced characterization, including modelling of the surface of semiconductor nanomaterials over different length scales, including their chemical, electronic, morphological and optical properties, with respect to their application,
- Applications of semiconductor functional nanomaterials of well-controlled surfaces in the development of specific semiconductor nanodevices for, among others, nanoelectronics, optoelectronics, and spintronics.

of Pisa, 56126 Pisa, PI, Italy

Message from the Editor-in-Chief

Welcome to *Crystals*, the journal dedicated to the fascinating world of crystallographic research! Crystals are more than mere decorative elements; they hold the key to understanding the fundamental structure of matter. Our mission is to explore the crucial significance of this research across various fields. From medicine to technology, chemistry to geology, crystals play a vital role. Their structure provides insights into new advanced materials, innovative drugs, and groundbreaking technologies. Through *Crystals*, we delve into the microscopic world to discover solutions that will shape the future. Join us on a journey through the *Crystals*, where science merges with beauty and innovation.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [Inspec](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Crystallography*) / CiteScore - Q2 (*Condensed Matter Physics*)
