School of Electronic Science and Engineering, Southeast University, Nanjing, China

Deadline for manuscript submissions:

**closed (25 June 2021)**

### Message from the Guest Editors

This Special Issue of *Crystals* serves to provide a platform for researchers to report results and findings in liquid-crystal or liquid-crystal-polymer PVGs in the aspects of material, processing, patterning, polymerization, molecular kinematics, optical properties, and their application on optical systems.

Potential topics include but are not limited to:

- Materials for PVGs
- Interplay between materials and PVG structures
- Effect of processing and patterning on PVGs
- Optical characteristics of PVGs
- Novel structures of PVGs
- Optical systems based on PVGs

an Open Access Journal by MDPI

of Pisa, 56126 Pisa, Italy

## Message from the Editor-in-Chief

Welcome to *Crystals*, the journal dedicated to the fascinating world of crystallographic research! Crystals are more than mere decorative elements; they hold the key to understanding the fundamental structure of matter. Our mission is to explore the crucial significance of this research across various fields. From medicine to technology, chemistry to geology, crystals play a vital role. Their structure provides insights into new advanced materials, innovative drugs, and groundbreaking technologies. Through *Crystals*, we delve into the microscopic world to discover solutions that will shape the future. Join us on a journey through the *Crystals*, where science merges with beauty and innovation.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [Inspec](#), [CAPus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Crystallography*) / CiteScore - Q2 (*Condensed Matter Physics*)
