Deadline for manuscript
submissions:

15 May 2020

Message from the Guest Editor

This Special Issue gives the opportunity to present the important and timely contributions to the field of the supramolecular self-assembly driven by halogen bonding in various fields of application. We encourage to contribute to this Special Issue all scientists active in a wide range of disciplines to present their up-to-date interesting results including data from fundamental research up to practical applications. We want to highlight the most recent advances, challenges and perspectives in this research area. Scientists are invited to contribute with original papers or short reviews on their activity in the field.

- halogen bonding
- supramolecular self-assembly
- supramolecular architecture
- organic and coordination compounds
- topological studies
- intermolecular interactions

Editor-in-Chief

Prof. Dr. Helmut Cölfen

Physical Chemistry, Universität
Konstanz, Germany

Message from the Editor-in-Chief

Crystals are a very important class of structured material, both from a scientific and technological viewpoint. In 2011, the Nobel Prize in Chemistry was awarded to Dan Schechtman for his work on quasicrystals. Our journal already expresses in its name *Crystals* that its focus centers around all aspects of this class of materials, which has fascinated humankind from its beginning. Despite decades of research on crystals, it remains a hot and fascinating research topic.

Crystals is a good platform for dissemination of knowledge in this area.

Author Benefits

Open Access free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: Indexed by the **Science Citation Index Expanded** (SCIE-Web of Science), Scopus, SciFinder (CAS), *Inspec* (IET), Current Contents - Physical, Chemical & Earth Sciences and other databases.

Rapid Publication: manuscripts are peer-reviewed and a first decision provided to authors approximately 12.2 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2019).
