Deadline for manuscript
submissions:

20 June 2024

Message from the Guest Editor

Nowadays, electrochemical energy storage and conversion devices are fundamental components of the green transition towards a more sustainable and environmentally friendly society independent from fossil fuels. On the other hand, catalysis has a wide range of high industrial impact applications, ranging from the production of polymers to the treatment of noxious emissions.

Therefore, the aim of this Special Issue is to reveal insights into the materials used for electrochemical energy storage and conversion devices and for catalysis applied to the energy field. The intended scope of the selected publications is to shed light on the complex relationship between the crystal structure and morphology and the properties of the materials that determine the final performances of the devices where they are applied.

We invite interested authors to submit their original experimental, theoretical and review papers focusing on the subject for inclusion in this Special Issue.

Message from the Editor-in-Chief

Welcome to *Crystals*, the journal dedicated to the fascinating world of crystallographic research! Crystals are more than mere decorative elements; they hold the key to understanding the fundamental structure of matter. Our mission is to explore the crucial significance of this research across various fields. From medicine to technology, chemistry to geology, crystals play a vital role. Their structure provides insights into new advanced materials, innovative drugs, and groundbreaking technologies. Through *Crystals*, we delve into the microscopic world to discover solutions that will shape the future. Join us on a journey through the *Crystals*, where science merges with beauty and innovation.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [Inspec](#), [CAPus](#) / [SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Crystallography*) / CiteScore - Q2 (*Condensed Matter Physics*)
