Message from the Guest Editors

We invite researchers from various field of studies to contribute studies to this Special Issue of Crystals, entitled "Spectroscopic Insights into Molecular Crystals". Published articles will include (but are not limited to) the topics listed below:

- the design and synthesis of new molecular crystals;
- theoretical approaches to molecular crystal structures and features;
- material and spectroscopic studies connecting molecular crystal structure and optical features;
- molecular crystal characterization using advanced spectroscopy, materials, microscopy, and other advanced techniques;
- exploration of the new pathways for molecular crystal application—perspectives and approaches.

Deadline for manuscript
submissions:

closed (20 November 2020)

Editor-in-Chief

Physical Chemistry, Universität
Konstanz, Germany

Message from the Editor-in-Chief

Crystals are a very important class of structured material, both from a scientific and technological viewpoint. In 2011, the Nobel Prize in Chemistry was awarded to Dan Schechtman for his work on quasicrystals. Our journal already expresses in its name *Crystals* that its focus centers around all aspects of this class of materials, which has fascinated humankind from its beginning. Despite decades of research on crystals, it remains a hot and fascinating research topic.

Crystals is a good platform for dissemination of knowledge in this area.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: Indexed by the [Science Citation Index Expanded](#) (Web of Science), [Scopus](#), [SciFinder \(CAS\)](#), [Inspec \(IET\)](#), [Current Contents - Physical, Chemical & Earth Sciences](#) and [other databases](#).

CiteScore 2019 (Scopus): 2.9, ranks 103/281 in 'General Chemical Engineering', 208/460 in 'General Materials Science', and 191/403 in 'Condensed Matter Physics'.
