Message from the Guest Editor

Concrete is one of the most widely used construction materials in the world today. Research in concrete follows the environment impact, economy, population, and advanced technology. This Special Issue invites recent numerical studies for research in concrete. Some of the topics of interest include finite element analysis, digital concrete, the reinforcement technique without rebars, and 3D printing.

Welcome to *Crystals*, the journal dedicated to the fascinating world of crystallographic research! Crystals are more than mere decorative elements; they hold the key to understanding the fundamental structure of matter. Our mission is to explore the crucial significance of this research across various fields. From medicine to technology, chemistry to geology, crystals play a vital role. Their structure provides insights into new advanced materials, innovative drugs, and groundbreaking technologies. Through *Crystals*, we delve into the microscopic world to discover solutions that will shape the future. Join us on a journey through the *Crystals*, where science merges with beauty and innovation.
