Message from the Guest Editor

Dear Colleagues,

Researchers in various fields of chemistry and other disciplines (physics, crystallography, computer science, etc.) are welcome to submit their work on this topic to our Special Issue “Non-Covalent Interactions in Coordination and Organometallic Chemistry”.

This Special Issue will highlight and overview modern trends and bring various types of non-covalent interactions in coordination and organometallic compounds to the attention of the scientific community.

All types of papers (reviews, mini-reviews, full papers, communications, and technical notes, highlights) are welcome for consideration.

Welcome to *Crystals*, the journal dedicated to the fascinating world of crystallographic research! Crystals are more than mere decorative elements; they hold the key to understanding the fundamental structure of matter. Our mission is to explore the crucial significance of this research across various fields. From medicine to technology, chemistry to geology, crystals play a vital role. Their structure provides insights into new advanced materials, innovative drugs, and groundbreaking technologies. Through *Crystals*, we delve into the microscopic world to discover solutions that will shape the future. Join us on a journey through the *Crystals*, where science merges with beauty and innovation.
