

Special Issue

Silicon-Based Photovoltaic Materials and Devices

Message from the Guest Editors

The aim of the journal *Crystals* is to disseminate research, development, application, measurement on materials science and technology related to silicon-based solar cells. Of particular interest are the silicon heterojunction solar cell, passivated emitter and rear cell and tunnel oxide passivated contact solar cell.

About the Journal

Message from the Editor-in-Chief

Welcome to *Crystals*, the journal dedicated to the fascinating world of crystallographic research! Crystals are more than mere decorative elements; they hold the key to understanding the fundamental structure of matter. Our mission is to explore the crucial significance of this research across various fields. From medicine to technology, chemistry to geology, crystals play a vital role. Their structure provides insights into new advanced materials, innovative drugs, and groundbreaking technologies. Through *Crystals*, we delve into the microscopic world to discover solutions that will shape the future. Join us on a journey through the *Crystals*, where science merges with beauty and innovation.
