

Special Issue

Advanced Research on Macromolecular Crystals (2nd Edition)

Message from the Guest Editors

The aim of this Special Issue on “Advanced Research on Macromolecular Crystals” is to make known relevant works to our colleagues in the field of macromolecular crystals. The new Special Issue will be guest-edited by Jesús Sanmartín-Matalobos and Eamor M. Woo, who are inviting prominent scientists in the field to submit original research articles, review articles, and short communications focused on the abovementioned subjects of polymeric and macromolecular crystalline materials.

The coverage of topics for this Special Issue is as broad as that of macromolecular crystals, ranging from the synthesis, nucleation, growth, processing, and characterization of macromolecular crystalline materials to the mechanical, chemical, electrical, magnetic, catalytic, optical, and self-assembly properties, as well as their diverse applications. Among many other subject areas, the topic of macromolecular crystals includes plastics, synthetic fibres, synthetic rubbers, graphene carbon nanotubes, supramolecular polymers, polymer composites, metal–organic frameworks (MOFs) and polymer–MOF hybrid materials, and liquid-crystalline polymers.

Guest Editors

Prof. Dr. Eamor M. Woo

Department of Chemical Engineering, National Cheng Kung University,
No. 1, University Road, Tainan 701-01, Taiwan

Prof. Dr. Jesús Sanmartín-Matalobos

Inorganic Chemistry Department, University of Santiago de
Compostela, 15782 Santiago de Compostela, Spain

Deadline for manuscript submissions

closed (23 December 2024)

About the Journal

Message from the Editor-in-Chief

Welcome to *Crystals*, the journal dedicated to the fascinating world of crystallographic research! Crystals are more than mere decorative elements; they hold the key to understanding the fundamental structure of matter. Our mission is to explore the crucial significance of this research across various fields. From medicine to technology, chemistry to geology, crystals play a vital role. Their structure provides insights into new advanced materials, innovative drugs, and groundbreaking technologies. Through *Crystals*, we delve into the microscopic world to discover solutions that will shape the future. Join us on a journey through the *Crystals*, where science merges with beauty and innovation.

Editor-in-Chief

Prof. Dr. Alessandra Toncelli

Department of Physics, University of Pisa, 56126 Pisa, PI, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Crystallography) / CiteScore - Q2 (Condensed Matter Physics)
