

## Special Issue

# Crystal Structures of Amino Acids and Peptides

### Message from the Guest Editor

The Special Issue on “Crystal Structures of Various Amino Acids and Peptides” is intended to collect contributions from scientist working with a broad spectrum of crystal properties as well as on crystal growth, manifesting the impact of these small, yet incredibly important molecules. I hope we can inspire each other and open avenues to future research projects into the unknown. The topics summarized under the keywords cover broadly examples of the greater number of sub-topics in mind and should be seen as examples rather than limitations. Innovative research within chemistry, physics or pharmacy is particularly welcome.

## About the Journal

### Message from the Editor-in-Chief

Welcome to *Crystals*, the journal dedicated to the fascinating world of crystallographic research! Crystals are more than mere decorative elements; they hold the key to understanding the fundamental structure of matter. Our mission is to explore the crucial significance of this research across various fields. From medicine to technology, chemistry to geology, crystals play a vital role. Their structure provides insights into new advanced materials, innovative drugs, and groundbreaking technologies. Through *Crystals*, we delve into the microscopic world to discover solutions that will shape the future. Join us on a journey through the *Crystals*, where science merges with beauty and innovation.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Crystallography) / CiteScore - Q2 (Condensed Matter Physics)
