Special Issue

Structural Characterization of Calcium Phosphates by Means of X-ray Diffraction

Message from the Guest Editor

We invite colleagues to submit papers on calcium phosphate materials, both natural and synthetized, with possible substitutions both at Ca sites (Sr, Pb, REE, etc) and at anionic groups (V, As, etc), which relate to the methods and synthesis for novel phosphate nanomaterials, their structural characterization by means of X-ray diffraction, joined by other complementary techniques (SEM–EDS, FTIR, Raman, luminescence etc.), and possible applications/interests in biomedical sciences, materials, cultural heritage, optics, mineralogy, planetary sciences, etc., including: - Ca5(PO4)3(OH,F,Cl) apatite; - Ca3(PO4)2 tricalcium phosphate (TCP); - Ca9(Mg,Fe)(PO4)6(PO3OH) whitlockite; - Other Ca orthophosphate phases, such as CaHPO4·2H2O brushite, CaHPO4 monetite, oxyapatite Ca5(PO4)3O1/2, etc.; - Calcium diphosphates or polyphosphates of any technological interest.

About the Journal

Message from the Editor-in-Chief

Welcome to *Crystals*, the journal dedicated to the fascinating world of crystallographic research! Crystals are more than mere decorative elements; they hold the key to understanding the fundamental structure of matter. Our mission is to explore the crucial significance of this research across various fields. From medicine to technology, chemistry to geology, crystals play a vital role. Their structure provides insights into new advanced materials, innovative drugs, and groundbreaking technologies. Through *Crystals*, we delve into the microscopic world to discover solutions that will shape the future. Join us on a journey through the *Crystals*, where science merges with beauty and innovation.

Editor-in-Chief

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Crystallography) / CiteScore - Q2 (Condensed Matter Physics)
