Special Issue

Synthesis and Application of Nanocomposite Materials

Message from the Guest Editors

In the realm of material science, the spotlight is now firmly fixed on nanocomposites, captivating the scientific community with their remarkable potential to enhance the intrinsic qualities of polymers while introducing innovative functionalities.

This Special Issue has been curated to shine a spotlight on the most recent and groundbreaking developments within the world of nanoparticles and nanocomposites, with a particular emphasis on the remarkable multifunctionality that nanostructures bring to a diverse array of applications. Of note are the cutting-edge advances in creating novel strain sensors and solid polymer electrolytes, elevating the performance of structural batteries and supercapacitors, and pioneering biosensors and human motion detectors. Moreover, we eagerly welcome studies that investigate the influence of nanostructures on other aspects, boosting the performance of conventional polymers and polymer matrix composites. Theoretical models focused on the mechanical, electrical, thermal, electrochemical, or biological behavior of nanostructured polymers are also warmly encouraged.

Guest Editors

Dr. Antonio Del Bosque
Technology, Instruction, and Design in Engineering and Education Research Group (TiDEE.rg), Catholic University of Ávila, 05005 Ávila, Spain

Dr. Xoan Xosé Fernández Sánchez-Romate
Materials Science and Engineering Area, University Rey Juan Carlos, C/ Tulipán s/n, 28933 Móstoles, Madrid, Spain

Deadline for manuscript submissions

closed (10 April 2025)

About the Journal

Message from the Editor-in-Chief

Welcome to *Crystals*, the journal dedicated to the fascinating world of crystallographic research! Crystals are more than mere decorative elements; they hold the key to understanding the fundamental structure of matter. Our mission is to explore the crucial significance of this research across various fields. From medicine to technology, chemistry to geology, crystals play a vital role. Their structure provides insights into new advanced materials, innovative drugs, and groundbreaking technologies. Through *Crystals*, we delve into the microscopic world to discover solutions that will shape the future. Join us on a journey through the *Crystals*, where science merges with beauty and innovation.

Editor-in-Chief

Prof. Dr. Alessandra Toncelli
Department of Physics, University of Pisa, 56126 Pisa, PI, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Crystallography) / CiteScore - Q2 (Condensed Matter Physics)
