Special Issue

Advanced Research on Heterogeneous Materials

Message from the Guest Editors

This Special Issue of *Crystals* provides an opportunity for presenting the recent advancements in the multidisciplinary experimental and theoretical research on heterogeneous materials, with special attention to their application, processing, and characterization techniques. Multifunctional heterogeneous materials for energy, biomedical, and structural applications are of interest. Original research articles, as well as short reviews highlighting advanced research on heterogeneous materials, are welcome in this Special Issue. Potential topics of interest include but are not limited to:

- Design and development of advanced heterogeneous materials
- Novel characterization techniques
- Multifunctional and multiscale heterogeneous materials for superior properties
- Composites, layered, and graded materials and structures for energy, biomedical, and structural applications

About the Journal

Message from the Editor-in-Chief

Welcome to *Crystals*, the journal dedicated to the fascinating world of crystallographic research! Crystals are more than mere decorative elements; they hold the key to understanding the fundamental structure of matter. Our mission is to explore the crucial significance of this research across various fields. From medicine to technology, chemistry to geology, crystals play a vital role. Their structure provides insights into new advanced materials, innovative drugs, and groundbreaking technologies. Through *Crystals*, we delve into the microscopic world to discover solutions that will shape the future. Join us on a journey through the *Crystals*, where science merges with beauty and innovation.

Editor-in-Chief

Prof. Dr. Alessandra Toncelli
Department of Physics, University of Pisa, 56126 Pisa, Pl, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Crystallography) / CiteScore - Q2 (Condensed Matter Physics)
